Related Concepts	2

Overview

Waves combine by adding amplitudes

Core Ideas

- Define the concept in your own words.
- Identify the key variables and relationships.
- Connect the concept to the module inquiry question.

Key Formulas

- **Beat Frequency:**

$$f_{beat} = |f_2 - f_1|$$

Exam Focus

- Expect both multiple choice and short answer questions.
- Show working and use correct units.

Related Concepts

- Review the linked module section for context and extensions.
